8 STAGES, 19 VILLAGES, ONE CLOSED LOOP

Each of the 19 municipalities of the DOQ is visited exactly once: **Falset** opens and closes the loop. The backbone is the **GR-174**, completed with PR-C paths and historic farm tracks — which is why waymarking is intermittent and the GPX track is essential.

GETTING TO FALSET

TRAIN RENFE Rodalies **R15** Barcelona–Tarragona–Reus–**MARÇÀ-FALSET** (2 km from town; minibus 977 831 871).

BUS HIFE 977 440 300 (Barcelona–Alcañiz, Mon–Fri) · Igualadina 902 292 900 (Tarragona–Gandesa) · Plana 977 553 680 (Reus/Barcelona–Cornudella, Poboleda…).

CAR C-242 Reus–Falset–Móra d'Ebre · T-702/N-420 from Tarragona. Park in Falset: start and finish.

PLANE Reus Airport, 35 km away (closed during the winter season).

HOW TO USE THIS CARD

1 · The GPX rules. Load each stage's track into your app with offline maps (OsmAnd, Komoot, Gaia…) plus a power bank. This card gives context and services; the track decides the way.

2 · Junction by junction. Waymarking is intermittent: at every fork confirm the direction with the GPX; if in doubt, go back to the last safe point.

3 · Check before you set out. Opening hours and phone numbers change out of season: confirm every service (sources: Turisme Priorat, Google).

4 · First time? 3-day short route: E1 + E2 + Bellmunt→Falset link (14.3 km) = **53.6 km**.

HEAT EXHAUSTION & HEAT STROKE

Heat exhaustion (resolved by stopping): heavy sweating, weakness, dizziness, pale skin. Stop, find shade, drink with electrolytes and rest for at least 30 minutes.

Heat stroke (emergency): hot, dry skin, confusion, very high temperature. Call **112** and cool the person down while help arrives.

Alarm sign: if you stop sweating in extreme heat but keep walking, you must stop immediately.

WATER BY STAGE

STAGE	LITRES / PERSON	CRITICAL NOTE
1 · Falset → Guiamets	2.5–3 L	Start full from Falset
2 · Guiamets → Bellmunt	**4–5 L**	No reliable springs
3 · Bellmunt → Cabacés	2.5–3 L	Food critical: Forn El Mulo
4 · Cabacés → Margalef	2–2.5 L	Short stage
5 · Margalef → Cornudella	**4–5 L**	Queen stage: splits at Ulldemolins
6 · Cornudella → Poboleda	2.5–3 L	Bar in Siurana
7 · Poboleda → Torroja	2.5–3 L	Font del Mingot (Poboleda)
8 · Torroja → Falset	2.5–3 L	Font de les Amades (Falset)

Reference springs are not guaranteed to be potable: carry purification tablets or a filter. In heat, add electrolytes, not just water.

1 · HEAT

Avoid July and August (35–38 °C, no shade). Best months are April–June and September–November. In summer: set off before 7:00 and rest between 13:00 and 17:00; stages 2 and 5 are the most exposed.

2 · LICORELLA SLATE & FOOTWEAR

Black slate is slippery when loose or wet: boots with grippy soles (not smooth trainers), poles on stages 2 and 5, light gaiters where there is scrub.

3 · OFFLINE GPX & BATTERY

The circuit is not a waymarked trail of its own: it links GR-174 and PR-C sections with intermittent waymarking. Track loaded + power bank + paper backup map (IGN or Alpina Montsant).

4 · RESERVE FOOD

Carry an emergency ration for a full day: in villages of 100–300 inhabitants the only bar closes on its weekly rest day or out of season. Bakeries open early.

5 · WINTER UP HIGH

Siurana (737 m) and the Montsant crest can bring frost, fog and slippery ground: the greater risk is slipping, not cold. Plan each stage with plenty of daylight to spare.

Buen camino · Bon camí — happy trails.

La terra és dura i solitària: honestedat, aigua i bon criteri.
